

Requirements:

Frontend

Views:

- Login
- Registration
- Bluetooth help
- Device status
- Data display/data history
- Data detail view page
- Account settings

Login:

- Has a register button
- Has space for user to enter phone number
- Has "Login" button that user clicks to submit phone number
- Phone number gets sent to the backend and authenticated
- Once authentication happens, user is logged in and gets taken to the "device status" page

Registration:

- Users will be prompted with 2 input fields, Name and Phone Number.
- Register button is shown below
- One button click, check to see if valid inputs, if yes call a RegisterUser function
- Once RegisterUser is called, data is sent to the backend where the user is registered
- Once user has been registered they are taken to the device status page

Bluetooth help

- Contains a textbox with instructions on how to connect to the device
- Provides link to apples services on more in depth bluetooth device help/info

Device status

- Shows which device user is currently connected to and its status
- Shows all previous/saved devices
- Users should be able to choose another device to connect to
- If a user is connected to a device, they should be able to disconnect from it
- Users should be able to scan for devices to connect to

Data display/data history

- Shows a list of all data requests from hardware
- Clickable list, each object will have a detailview page
- Will show an icon if data has been uploaded or not

Data Detail View

- Will have an upload data button that sends the data to the backend
- Shows time and location of when data was pulled
- Page displays charts/graphs of information from the request

Account settings

- Contains a textbox displaying
 - user's name
 - User's phone number
 - User collection preferences (meters, feet...)
 - Notification on/off toggle
- Contains a textbox displaying
 - Device currently connected
 - Auto connect toggle
- Contains a log out button
- When users press "logout" they are logged out and taken to the login page

Other

- All 4 main views must display a taskbar at the bottom

Hardware

Questions:

- Should users be able to upload multiple data sets at once or one by one only
